Pre - Test Question Paper Solving (2020-21)

Class: IV

Sub: Mathematics

Max. Marks: 20

Duration: 1 hour

Section A

I. Solve the following:

2x1=2

1. Give an example for commutative property of addition.
2. Write the missing addend.

$$\begin{array}{r} 45321 \\ + \quad \quad \quad \\ \hline 86954 \end{array}$$

Section B

II. Solve the following:

2x2=4

1. Write in ascending and descending order:

45,63,774 ; 47,34,786 ; 45,36,774 ; 44,87,453

2. Find the sum: $32,312 + 4,65,578 + 8,03,789$

Section C

III. Solve the following:

3x2=6

1. (a) Write in Roman numerals: (i) 87 (ii) 49

(b) Write the place value of 7 in 37,985.

2. Using 4, 6, 2, 0, 3, 1 and 9, form any six 7-digit numbers including the greatest and smallest 7-digit numbers. Circle the greatest and underline the smallest number.

Section D

IV. Solve the following:

4x2=8

1. (a) Mr. Anand Shah bought a sofa set for Rs. 43,975, a T.V for Rs.79,500 and a car for Rs. 12, 34,100. How much did he spend in all?

(b) Write the Hindu-Arabic numbers for LXXVIII.

2. (a) Write in words using both Indian and International number system: 6534259

(b) Find the sum of the greatest 5-digit and smallest 5-digit number.
